

Note: These maps may not include all Special Flood Hazard Areas in the community. After a more detailed study, the Special Flood Hazard Areas shown on these maps may be modified, and other areas added.

APPROXIMATE SCALE IN FEET

2000 0 2000

A horizontal scale bar with markings at 2000, 0, and 2000 feet. The bar is divided into segments by vertical tick marks. The segment between 0 and 2000 on the left is further subdivided into four equal parts, each representing 500 feet. The segment between 0 and 2000 on the right is also subdivided into four equal parts, each representing 500 feet. The total length of the bar is 4000 feet.
