ORDINANCE NO. 248

AN ORDINANCE OF THE TOWN OF DAYTON, WYOMING TO COMPLY WITH THE REQUIREMENTS OF THE NATIONAL FLOOD INSURANCE PROGRAM (NFIP) BY ADOPTING REVISED FLOODPLAIN MANAGEMENT REGULATIONS THAT MEET THE MINIMUM REQUIREMENTS OF THE NFIP, AND TO REPEAL ORDINANCE NUMBER 218.

NOW, THEREFORE, BE IT ORDAINED BY THE TOWN COUNCIL OF THE TOWN OF DAYTON, WYOMING THE INTENT TO ESTABLISH A FLOOD DAMAGE PREVENTION ORDINANCE.

SECTION 1.0

1.1 STATUTORY AUTHORIZATION
The legislature of the State of Wyoming has in WS Section 15-1-114 delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, the Town Council of the Town of Dayton, Wyoming does ordain as follows:

1.2 FINDINGS OF FACT
(1) The flood hazard areas of Dayton are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

(2) These flood losses are caused by the cumulative effect of obstructions in areas of special flood hazards which increase flood heights and velocities, and when inadequately anchored, damage uses in other areas. Uses that are inadequately floodproofed, elevated, or otherwise protected from flood damage also contribute to the flood loss.

1.3 STATEMENT OF PURPOSE
It is the purpose of this ordinance to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed:

(1) To protect human life and health;
(2) To minimize expenditure of public money for costly flood control projects;
(3) To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
(4) To minimize prolonged business interruptions;
(5) To minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets, and bridges located in areas of special flood hazard;
(6) To help maintain a stable tax base by providing for the sound use and development of areas of special flood hazard so as to minimize future flood blight areas;
(7) To insure that potential buyers are notified that property in is an area of special flood hazard; and
(8) To ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

1.4 METHODS OF REDUCING FLOOD LOSSES
In order to accomplish its purpose, this ordinance includes methods and provisions for:
(1) Restricting or prohibiting uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;

(2) Requiring that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;

(3) Controlling the alteration of natural floodplains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;

(4) Controlling filling, grading, dredging, and other development which may increase flood damage; and,

(5) Preventing or regulating the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards in other areas.

SECTION 2.0
DEFINITIONS

Unless specifically defined below, words or phrases used in this ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its most reasonable application.

"Area of special flood hazard" means the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year.

"Base flood" means the flood having a one percent chance of being equalled or exceeded in any given year.

"Development" means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations located within the area of special flood hazard.

"Flood" or "flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

1. The overflow of inland or tidal waters and/or
2. The unusual and rapid accumulation or runoff of surface waters from any source.

"Flood Insurance Rate Map FIRM" means an official map of a community on which the Federal Emergency Management Agency has delineated areas of special flood hazard designated as Zone A.

"Manufactured home" means a structure, transportable in one or more sections, which is built on a permanent chassis and is designated for use with or without a permanent foundation when connected to the required utilities. This term also includes park trailers, travel trailers and other similar vehicles placed on a site for greater than 180 consecutive days.

"Structure" means a walled and roofed building or manufactured home that is principally above ground.

"Substantial improvement" means any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either:
(1) before the improvement or repair is started, or
(2) if the structure has been damaged and is being restored, before the
damage occurred. For the purpose of this definition "substantial
improvement" is considered to occur when the first alteration of any
wall, ceiling, floor, or other structural part of the building commences,
whether or not that alteration affects the external dimensions of the
structure.

The term does not, however, include either:
(1) any project for improvement of a structure to comply with existing state
or local health, sanitary, or safety code specifications which are solely
necessary to assure safe living conditions, or
(2) any alteration of a structure listed on the National Register or Historic
Places or a State Inventory of Historic Places.

SECTION 3.0
GENERAL PROVISIONS

3.1 LANDS TO WHICH THIS ORDINANCE APPLIES
This ordinance shall apply to all areas of special flood hazards within the juris-
diction of the Town of Dayton, Wyoming.

3.2 BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD
The areas of special flood hazard identified by the Federal Emergency Management
Agency in its Flood Insurance Rate Map (FIRM), dated July 1, 1986, is adopted by
reference and declared to be part of this ordinance. The FIRM is on file at
608 Broadway, Dayton, Wyoming.

3.3 COMPLIANCE
No structure or land shall hereafter be constructed, located, extended, or altered
without full compliance with the terms of this ordinance and other applicable
regulations.

3.4 ABROGATION AND GREATER RESTRICTIONS
This ordinance is not intended to repeal, abrogate, or impair any existing ease-
ments, covenants, or deed restrictions. However, where this ordinance and another
ordinance, easement, covenant, or deed restriction conflict or overlap, whichever
imposes the more stringent restrictions shall prevail.

3.5 INTERPRETATION
In the interpretation of this ordinance, all provisions shall be:
(1) Considered as minimum requirements;
(2) Liberally construed in favor of the governing body; and,
(3) Deemed neither to limit nor repeal any other powers granted under state
statutes.

3.6 WARNING AND DISCLAIMER OF LIABILITY
The degree of flood protection required by this ordinance is considered reasonable
for regulatory purposes and is based on scientific and engineering considerations.
Larger floods can and will occur on rare occasions. Flood heights may be increased
by man-made or natural causes. This ordinance does not imply that land outside the
areas of special flood hazards or uses permitted within such areas of special
flood hazards or uses permitted within such areas will be free from flooding or
flood damages. This ordinance shall not create liability on the part of the Town
of Dayton, Wyoming, any officer or employee thereof, or the Federal Emergency
Management Agency, for any flood damages that result from reliance on this ordi-
ance or any administrative decision lawfully made thereunder.
SECTION 4.0
ADMINISTRATION

4.1 ESTABLISHMENT OF DEVELOPMENT PERMIT
A development permit shall be obtained before construction or development begins within any area of special flood hazard established in Section 3.2. Application for a development permit shall be made on forms furnished by the Building Permit Administrator and may include, but not be limited to:

Plans in duplicate drawn to scale showing the nature, location, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities; and the location of the foregoing. Specifically, the following information is required:

1. Elevation in relation to mean sea level of the lowest floor (including basement) of all structures;
2. Elevation in relation to mean sea level to which any structure has been floodproofed;
3. Certification by a registered professional engineer or architect that the floodproofing methods for any non-residential structure meet the floodproofing criteria in Section 5.2-2; and,
4. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development.

4.2 DESIGNATION OF THE BUILDING PERMIT ADMINISTRATOR
The Building Permit Administrator is hereby appointed to administer and implement this ordinance by granting or denying development permit applications in accordance with its provisions.

4.3 DUTIES AND RESPONSIBILITIES OF THE BUILDING PERMIT ADMINISTRATOR
Duties of the Building Permit Administrator shall include but not be limited to:

4.3-1 Permit Review
(1) Review all development permits to determine that the permit requirements of this ordinance have been satisfied.
(2) Review all development permits to determine that all necessary permits have been obtained from those Federal, State or local governmental agencies from which prior approval is required.
(3) Review all development permits to determine if the proposed development adversely affects the flood carrying capacity of the area of special flood hazard. For the purposes of this ordinance, "adversely affects" means damage to adjacent properties because of rises in flood stages attributed to physical changes of the channel and the adjacent overbank areas.
   (i) If it is determined that there is no adverse effect and the development is not a building, then the permit shall be granted without further consideration.
   (ii) If it is determined that there is an adverse effect, then technical justification (i.e., a registered professional engineer's certification) for the proposed development shall be required.
   (iii) If the proposed development is a building, then the provisions of this ordinance shall apply.

4.3-2 Use of Other Base Flood Data
When base flood elevation data has not been provided in accordance with Section 3.2, BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD, the Building Permit Administrator shall obtain, review, and reasonable utilize any base flood elevation and floodway data available from a Federal, State, or other source as criteria for requiring that new construction, substantial improvements, or other development in Zone A are administered in accordance with Section 5.2, SPECIFIC STANDARDS.
4.3-3 Information to be Obtained and Maintained
(1) Obtain and record the actual elevation (in relation to mean sea level) of the
lowest floor (including basement) of all new or substantially improved structures,
and whether or not the structure contains a basement.
(2) For all new or substantially improved floodproofed structures:
   (i) verify and record the actual elevation (in relation to mean sea level) to
       which the structure has been floodproofed.
   (ii) maintain the floodproofing certifications required in Section 4.1(3).
(3) Maintain for public inspection all records pertaining to the provisions of this
ordinance.

4.3-4 Alteration of Watercourses
(1) Notify adjacent communities and the Wyoming Disaster and Civil Defense Agency
prior to any alteration or relocation of a watercourse, and submit evidence
of such notification to the Federal Emergency Management Agency.
(2) Require that maintenance is provided within the altered or relocated portion of
said watercourse so that the flood carrying capacity is not diminished.

4.3-5 Interpretation of FIRM Boundaries
Make interpretations where needed, as to the exact location of the boundaries of
the areas of special flood hazards (for example, where there appears to be a con-
flict between a mapped boundary and actual field conditions).

SECTION 5.0
PROVISIONS FOR FLOOD HAZARD REDUCTION

5.1 GENERAL STANDARDS
In all areas of special flood hazards, the following standards are required:

5.1-1 Anchoring
(1) All new construction and substantial improvements shall be anchored to
    prevent flotation, collapse, or lateral movement of the structure and
    capable of resisting the hydrostatic and hydrodynamic loads.
(2) All manufactured homes must be elevated and anchored to resist flotation,
    collapse or lateral movement and capable of resisting the hydrostatic and
    hydrodynamic loads. Methods of anchoring may include, but are not limited
    to use of over-the-top or frame ties to ground anchors. This requirement
    is in addition to applicable State and local anchoring requirements for
    resisting wind forces. Specific requirements may be:
    (i) over-the-top ties be provided at each of the four corners of the
        manufactured home, with two additional ties per side at intermediate
        locations, with manufactured homes less than 50 feet long requiring
        one additional tie per side.
    (ii) frame ties be provided at each corner of the home with five addi-
        tional ties per side at intermediate points, with manufactured homes
        less than 50 feet long requiring four additional ties per side;
    (iii) all components of the anchoring system be capable of carrying a force
        of 4,800 pounds; and,
    (iv) any additions to the manufactured home be similarly anchored.

5.1-2 Construction Materials and Methods
(1) All new construction and substantial improvements shall be constructed
    with materials and utility equipment resistant to flood damage.
(2) All new construction and substantial improvements shall be constructed
    using methods and practices that minimize flood damage.
(3) All new construction and substantial improvements shall be constructed
    with electrical, heating, ventilation, plumbing, and air conditioning
    equipment and other service facilities that are designed and/or located
    so as to prevent water from entering or accumulating within the components
    during conditions of flooding.
5.1-3 Utilities
(1) All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system;
(2) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharge from the systems into flood waters; and,
(3) On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.

5.1-4 Subdivision Proposals
(1) All subdivision proposals shall be consistent with the need to minimize flood damage;
(2) All subdivision proposals shall have public utilities and facilities such as sewer, gas, electrical, and water systems located and constructed to minimize flood damage;
(3) All subdivision proposals shall have adequate drainage provided to reduce exposure to flood damage; and,
(4) Base flood elevation data shall be provided for subdivision proposals and other proposed development which contain at least 50 lots or 5 acres (whichever is less).

5.1-5 Encroachments
Encroachments, including fill, new construction, substantial improvements, and other development shall be prohibited in any floodway unless a technical evaluation demonstrates that the encroachments will not result in any increase in flood levels dueing the occurrence of the base flood discharge.

5.2 SPECIFIC STANDARDS
In all areas of special flood hazards where base flood elevation data has been provided as set forth in Section 4.3-2, Use of Other Base Flood Data, the following standards are required:

5.2-1 Residential Construction
New construction and substantial improvement of any residential structure shall have the lowest floor (including basement) elevated to or above the base flood elevation.

5.2-2 Nonresidential Construction
New construction and substantial improvement of any commercial, industrial or other nonresidential structure shall either have the lowest floor (including basement) elevated to the level of the base flood elevation; or, together with attendant utility and sanitary facilities shall:
(1) be floodproofed so that below the base flood elevation the structure is watertight with walls substantially impermeable to the passage of water;
(2) have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and
(3) be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this paragraph. Such certifications shall be provided to the official as set forth in Section 4.3-3 (2).

SECTION 6.0
REPEAL OF ORDINANCE

6.1 STATEMENT OF REPEAL
Ordinance Number 218 is hereby repealed.
PASSED, APPROVED AND ADOPTED by the Town Council for the Town of Dayton, Wyoming this 7th day of (December), 1987 and shall become effective upon posting by the Clerk in the manner provided by law.
